Author Index to Volume 50

Abdussattar and Vishwakarma, R. G.—
Some Robertson–Walker models with variable G and Λ 893
Akashi, H., Sakai, Y., and Tagashira, H.—
Modelling of a micro-streamer initiation and development of ArF excimer laser discharges 655
Allison, I.—
Physical processes determining the Antarctic sea ice environment 759
Amos, K., Dortmans, P. J., and Karataglidis, S.—
Signatures of medium effects on NN interactions in proton scattering from nuclei 245
Argyris, J., and Ciubotariu, C.—
Massive gravitons in general relativity 879
Asami, H.—
See Ishii, N. 123

Beesham, A.—
See Singh, G. P. 903
Bentz, W.—
See Ishii, N. 123
Bergmann, K.—
See Fewell, M. P. 281
Brown, A. S., Holt, S. A., Saville, P. M., and White, J. W. —
Neutron and X-ray reflectometry: Solid multilayers and crumpling films 391
Brunger, M. J.—
See Buckman, S. J. 483
Campbell, L. 525
Buckman, S. J.—
Foreword to special issue on 'Low Energy Atomic, Molecular and Chemical Physics' 439
Buckman, S. J., and Brunger, M. J.—
A critical comparison of electron scattering cross sections measured by single collision and swarm techniques 483
Buntar, V., Sauerzopf, F. M., and Weber, H. W.—
Solid state and magnetic properties of pure, intercalated and superconducting fullerenes 329
Burden, C. J., Qian, L., Roberts, C. D., Tandy, P. C., and Thomson, M. J.—
Meson spectrum from the Bethe–Salpeter equation 95
Bzenic, S. A.—
See Petrovic, Z. Lj. 591

Cadogan, J. M.—
Are there giant magnetic moments in Fe-nitrides? 1093
Magnetism and superconductivity in RNi_2B_2C compounds (R = Rare earth and Y) 1103
Cahill, R. T., and Gunner, S. M.—
Global colour model of QCD and its relationship to the NJL model, chiral perturbation theory and other models 103
Campbell, L., Brunger, M. J., Teubner, P. J. O., Mojarrabi, B., and Cartwright, D. C.—
Deconvolution of overlapping features in electron energy-loss spectra: Determination of absolute differential cross sections for electron-impact excitation of electronic states of molecules 525
Carbotte, J. P.—
See Marsiglio, F. 975, 1009
Carter, C. J.—
See Wang, J. B. 645
Cartwright, D. C.—
See Campbell, L. 525
Ciubotariu, C.—
See Argyris, J. 879
Clay, R. W.—
See Smith, A. G. K. 827
Close, J. D.—
See Stevenson, K. P. 683
Corney, S.—
Control of chaos in the Rössler system 263
Crompton, R. W.—
See Robertson, A. G. 441

Derlet, P. M., Perlman, H. S., and Troup, G. J.—
Stimulated vacuum pair production in a focused laser field 803
Dew-Hughes, D.—
Application of high temperature superconductors in passive microwave devices 363
Dortmans, P. J.—
See Amos, K. 245

Elford, M. T.—
See Robertson, A. G. 441
England, J. P., and Skullerud, H. R.—
Boundary effects in the Townsend–Huxley experiment 553

Faessler, A.—
See Tsushima, K. 35

Fewell, M. P.—
See Haydon, S. C. 627
Fewell, M. P., Shore, B. W., and Bergmann, K.—
Coherent population transfer among three states: Full algebraic solutions and the relevance of non adiabatic processes to transfer by delayed pulses 281
Fujii, H.—
See Tatsumi, T. 23
Fukutomi, M., Kumagai, S., and Maeda, H.—
Fabrication of $YBa_2Cu_3O_y$ thin films on textured buffer layers grown by plasma beam assisted deposition 381
Furst, J. E.—
See Yu, D. H. 639

Genz, H.—
Two remarks concerning the signs of the light quark masses 913
Ghosh, S. G.—
See Singh, G. P. 903
Govender, M.—
See Maharaj, S. D. 959
Greenwald, R. A.—
Space weather, SuperDARN and the Tasmanian Tiger 773
Guichon, P. A. M., Saito, K., and Thomas, A. W.—
Quarks in finite nuclei 115
Gunner, S. M.—
See Cahill, R. T. 103

Hamer, C. J.—
Finite-size scaling and effective Lagrangian theory 1051
Hatano, Y.—
Electron attachment and recombination in dense molecular media 615
Hatsuda, T.—
Tensor charge of the nucleon on a lattice 205
Haydon, S. C., and Fewell, M. P.—
Diffusion of excited neutral particles: Basic studies and potential applications 627
Hayes, P. A.—
See Yu, D. H. 639
Hicks, T. J.—
Magnetism and neutron scattering 1119
Neutron polarisation analysis, spin glasses and other systems 1127
Holt, S. A.—
See Brown, A. S. 391
Hosaka, A., and Walet, N. R.—
Algebraic method for large-N_c QCD 211

Huang, S. W.—
See Tsushima, K. 35
Hugrass, W. N.—
A new derivation for the radiation reaction force 815

Ichie, H.—
See Toki, H. 199
Ishii, M.—
Nonequilibrium process in the sigma model and chemical relaxation time in a homogeneous pionic gas 3
Ishii, N., Asami, H., Bentz, W., and Yazaki, K.—
Faddeev approach to the nucleon in the NJL model 123
Iwama, T.—
See Kohama, A. 131
Iwamoto, N.—
See Muto, T. 13

Jones, N. R.—
See Liu, D. 155
Jovanovic, J. V.—
See Petrovic, Z. Lj. 591

Karataglidis, S.—
See Amos, K. 245
Kibble, T. W. B.—
Phase transitions and topological defects in the early Universe 697
Kohama, A., Iwama, T., and Yazaki, K.—
Nuclear transparency in a relativistic quark model 131
Kondo, Y., Morimatsu, O., and Nishino, Y.—
Hadron–nucleon scattering lengths from QCD sum rules 221
Kumagai, S.—
See Fukutomi, M. 381
Kumano, S.—
Shadowing aspects of nuclear parton distributions 45
Kusaka, K., Piller, G., Thomas, A. W., and Williams, A. G.—
Structure functions of the nucleon in a covariant scalar spectator model 139
Kusaka, K., Simpson, K. M., and Williams, A. G.—
Solving the Bethe–Salpeter equation in Minkowski space: Scalar theories and beyond 147

Lewandowski, J. L. V.—
Local stability analysis of three-dimensional magnetically confined plasmas 921

Ling, M. F.—
Ab initio theory of magnetic correlations in itinerant magnets 1083
Liu, D., and Jones, N. R.—
Quark triangle diagrams and radiative meson decays 155
Lowke, J. J., and Quartel, J. C.—
Use of transport coefficients to calculate properties of electrode sheaths of electric arcs 539

McEachran, R. P., and Stauffer, A. D.—
Relativistic effects in low-energy electron–argon scattering 511
Maeda, H.—
See Fukutomi, M. 381
Maharaj, S. D., and Govender, M.—
Behaviour of the Kramer radiating star 959
Marsiglio, F., and Carbotte, J. P.—
Aspects of optical properties in conventional oxide superconductors 975
Quasiparticle lifetimes and the conductivity scattering rate 1011
Maruyama, T.—
See Tatsumi, T. 23
Matsuki, T., and Morii, T.—
Spectroscopy of heavy mesons expanded in $1/m_Q$ 163
Miyamura, O.—
See Suganuma, H. 233
Mojarrabi, B.—
See Campbell, L. 525
Mondal, K. K.—
See Paul, S. N. 319
Morii, T.—
See Matsuki, T. 163
Morimatsu, O.—
See Kondo, Y. 221
Morita, H., and Suzuki, T.—
Nuclear correlation effects in the deep inelastic structure function of ^{4}He 53
Morrison, M. A.—
See Robertson, A. G. 441
Muino, P. L.—
See Stevenson, K. P. 683
Muto, T., Tatsumi, T., and Iwamoto, N.—
Nonequilibrium processes in kaon condensation 13

Nejoh, Y. N.—
Effects of positron density and temperature on large amplitude ion-acoustic waves in an electron–positron–ion plasma 309
Nemoto, Y.—
See Takizawa, M. 187
Nesbet, R. K.—
Quantitative theory and accurate experiments: low-energy electron scattering by He and H_2 as case studies 473
Nishino, Y.—
See Kondo, Y. 221

O'Connell, H. B.—
Recent developments in rho–omega mixing 255
Oka, M.—
See Takizawa, M. 187

Paul, S. N., Mondal, K. K., and Roychowdhury, A.—
Effect of negative ions on the instability of ion-acoustic waves in a relativistic plasma 319
Perlman, H. S.—
See Derlet, P. M. 803
Petrovic, Z. Lj., Jovanovic, J. V., Raspopovic, Z. M., Bzenic, S. A., and Vrhovac, S. B.—
Influence of excited molecules on electron swarm transport coefficients and gas discharge kinetics 591
Piller, G.—
See Kusaka, K. 139

Qian, L.—
See Burden, C. J. 95
Quartel, J. C.—
See Lowke, J. J. 539

Raspopovic, Z. M.—
See Petrovic, Z. Lj. 591
Roberts, C. D.—
See Burden, C. J. 95
Robertson, A. G., Elford, M. T., Crompton, R. W., Morrison, M. A., Sun, W., and Trail, W. K.—
Rotational and vibrational excitation of nitrogen by electron impact 441
Robson, R. E.—
Diffusion cooling of electrons in an a.c. field 577
Rowley, N. —
Tunnelling in the presence of an environment: Insights from the fusion of heavy nuclei 731
Roychowdhury, A.—
See Paul, S. N. 319

Saito, K.—
See Guichon, P. A. M. 115
Saito, K., Thomas, A. W., and Williams, A. G.—
Preface to special issue on 'Quarks, Hadrons and Nuclei' 1

Sakai, Y.—
See Akashi, H. 655
Sasaki, S.—
See Suganuma, H. 233
Toki, H. 199
Sauerzopf, F. M.—
See Buntar, V. 329
Saville, P. M.—
See Brown, A. S. 391
Sen, S.—
Ballooning modes in a toroidally rotating plasma 935
Shigetani, T., Suzuki, K., and Toki, H.—
Structure functions of hadrons in the QCD effective theory 173
Shin, H.—
See Tatsumi, T. 23
Shore, B. W.—
See Fewell, M. P. 281
Signal, A. I. —
Higher twist structure functions 61
Simpson, K. M.—
See Kusaka, K. 147
Singh, G. P., Ghosh, S. G., and Beesham, A.—
A new class of Brans–Dicke cosmological models with causal viscous fluid 903
Skullerud, H. R.—
See England, J. P. 553
Smith, A. G. K., and Clay, R. W.—
Cosmic ray anisotropy studies with a small air shower array 827
Smrz, P. K.—
Construction of real space–time from complex linear metric connections 793
Song, G. L., and Bursill, L. A.—
HRTEM study of α-AlMnSi crystals including non-crystallographic projection axes 941
Stauffer, A. D.—
See McEachran, R. P. 511
Steffens, F. M., and Thomas, A. W. —
Polarised deep inelastic scattering 71
Stevenson, K. P., Close, J. D., Muino, P. L., and Watts, R. O.—
Potential energy surfaces for unsaturated hydrocarbons from crossed molecular beams 683
Stewart, A. M.—
Gauge explicit quantum mechanics and perturbation theory 869
Gauge invariant magnetism 1061
Suganuma, H.—
See Toki, H. 199
Suganuma, H., Umisedo, S., Sasaki, S., Toki, H., and Miyamura, O.—
Monopole dominance for nonperturbative QCD 233
Sun, W.—
See Robertson, A. G. 441
Suzuki, K.—
See Shigetani, T. 173
Suzuki, T.—
See Morita, H. 53

Tagashira, H.—
See Akashi, H. 655
Takizawa, M., Nemoto, Y., and Oka, M.—
Eta-meson decays and strong UA(1) breaking in the three-flavour Nambu–Jona-Lasinio model 187
Tanaka, K.—
Spin structure functions of the nucleon and twist-3 operators in QCD 79
Tandy, P. C.—
See Burden, C. J. 95
Tatsumi, T.—
See Muto, T. 13
Tatsumi, T., Shin, H., Maruyama, T., and Fujii, H.—
Kaon condensation and dilepton production from strange hadronic matter 23
Teubner, P. J. O.—
See Campbell, L. 525
Thomas, A. W.—
See Guichon, P. A. M. 115
Kusaka, K. 139
Saito, K. 1
Steffens, F. M. 71
Thomson, M. J.—
See Burden, C. J. 95
Thurgate, S. M.—
Auger spectroscopy and surface analysis 745
Tilbrook, D.—
General coordinatisations of the flat space–time of constant proper-acceleration 851
Toki, H.—
See Shigetani, T. 173
Suganuma, H. 233
Toki, H., Sasaki, S., Ichie, H., and Suganuma, H.—
Chiral symmetry breaking in the dual Ginzburg–Landau theory 199
Trail, W. K.—
See Robertson, A. G. 441
Troup, G. J.—
See Derlet, P. M. 803
Tsushima, K., Huang, S. W., and Faessler, A.—
A study of reactions for kaon production in heavy ion collisions 35

Ubachukwu, A. A.—
Linear size evolution and luminosity selection effects in quasars 967
Umisedo, S.—
See Suganuma, H. 233

Van Hieu, N.—
Wave equations of Cooper pairs as quasiparticles in superconducting fermion systems 1035
Viehland, L. A.—
Theoretical answers to some experimental questions about gaseous ion transport 671
Vishwakarma, R. G.—
See Abdussattar 893
Vrhovac, S. B.—
See Petrovic, Z. Lj. 591

Walet, N. R.—
See Hosaka, A. 211
Wang, J. B., Williams, J. F., and Carter, C. J.—
A Monte Carlo study of radiation trapping effects 645
Watts, R. O.—
See Stevenson, K. P. 683
Weber, H. W.—
See Buntar, V. 329
White, J. W. —
See Brown, A. S. 391
Williams, A. G.—
See Kusaka, K. 139, 147
Saito, K. 1
Williams, D. R. M.—
Driven granular media and dissipative gases: Phase transitions and instabilities 425
Williams, J. F.—
See Wang, J. B. 645
Yu, D. H. 639
Wolfendale, A. W.—
Physics and the cosmos: The origin of cosmic rays of 'low' and 'very high' energies 723

Yarovsky, I.—
Atomistic simulation of interfaces in materials: Theory and applications 407
Yazaki, K.—
See Ishii, N. 123
Kohama, A. 131
Yu, D. H., Hayes, P. A., Williams, J. F., and Furst, J. E.—
Polarised electron study of angular momentum coupling in the neon 3p states 639
